Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 September 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 6, 7, 11-14, 17-19, and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Steed et al #5,557,813. Steed et al discloses an assembly comprising an upholstery layer 14 for use with a mattress; a plurality of edge rails 20; and a plurality of hinges 34 connecting each one of the edge rails to the upholstery layer.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Steed et al in view of Frey #3,732,586. Steed et al discloses the claimed invention except for the edging comprising a single piece of foam. Frey teaches that it is known to provide a single piece of foam 11 as edging for a mattress assembly as set forth at column 2, lines 28-34. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a single piece of foam as edging, as

Art Unit: 3673

taught by Frey in order to provide a resilient border for a mattress assembly including a core.

5. Claims 8-10, 15, and 20-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Steed et al in view of Gladney et al #6,772,463. Steed et al discloses the claimed invention except for the tape or glue. Gladney et al teaches that it is known to provide tape or glue as set forth at column 3, lines 44-57. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide tape or glue, as taught by Gladney et al in order to facilitate securement of a mattress core to a perimeter edging.

Response to Arguments

6. Applicant's arguments filed 9/23/05 have been fully considered but they are not persuasive. Applicant's argue that Steed does not disclose the plurality of hinges. As broadly recited, the straps 34 would read on the plurality of hinges. The straps are capable of functioning as a hinge, furthermore, the straps would allow for rails to be independently moveable. Merriam-Webster defines a hinge as **1 a : a jointed or flexible device on which a door, lid, or other swinging part turns b : a flexible ligamentous joint**. Thus the strap as defined by Merriam-Webster may be read as a hinge.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 3673

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
